Hawaii.

The the passenger steamers of this line will arrive and leave this port Systematic Eifort Will Do as Much for Territory of Hawaii.

"The land department of the Oahu Railway & Land Company is disposed to co-operate with any plan to get settlers on the land," said George B. Mc-Rallroad, from San Francisco to all points in the United States, and from Clellan, land agent of the company, yesterday. "We are, first, in the business of transportation. The man who produces is the man who creates business for us. And we are in sympathy with any movement looking to the settlement of the country and to the growth of by-products by small farmers. There is nothing truer than that settlers invite settlement. The presence of one settler, favorably located and making a success of his venture, is sure to draw others into the same field. We want to put the settler on the land, and

> not of necessity on our land. "The railways of the mainland of the United States have recognized this fact, and the result of their efforts, and particularly of the efforts of the great Burlington system, has been to build up great farming communities on lands evel, and for standard gravity of Lat. 45. that a few years ago were little bethave reaped the immediate profits of this change in the physical condition of the country, but the farmers have likewise profited, and so has the whole country. This work has been done systematically, tirelessly, and great and prosperous commonwealths have grown up as a result of it. There is no way in which these islands can be so quickly Americanized, no way in which their rich natural resources can receive surer and faster development. Every farmer who comes here, every man who raises his family on the land, becomes a valuable member of the body politic. He has a stake in the country, and it is Times of the tide are taken from the to his interest to see that the country goes ahead in the right way. Also, in time, there will come to the most remote settler the means of getting his crop to market, provided he grows the crop. Settlement and development keep pace with each other. The railways p. m., which is the same as Greenwich. 9 have followed the farmer all over the

hours 0 minutes. Sun and moon are for west. "The man, J. W. White, whose arrival on the Miowera was noted in the Advertiser the other day, is of precisely the class we want to attract. He is a HOUSEHOLD furniture, including sewpractical horticulturist, level-headed, and he has come to see for himself what is here and what can be done by RESIDENCE on Thurston Ave. 4 lots a man with a little capital who wants to make his home in the country, and who will do so if he finds that production will pay here, and that the conditions are such as to make the venture reasonably sure of success. We have given him every facility for inspecting the country. He knows what he wants, and has intelligence enough to recognize it when he sees it. A man of his class, fortunately located, will draw many more, with the result that they will be put in the way of worldly prosperity, the country will be built up, and the railroad will be assured of its legitimate profit in the venture. The more products there are to be transported, the better it will be for us. That is business, and common sense. It is to our interest, as much as to the interest of everybody else in Hawaii to attract the right class of settlers here. Systematic effort in the right quarter will do it, too. We have that to offer which the settlers want, if we can bring

the man and the soil together." As showing how much in earnest are both the Oahu railway people and Mr. Wells, K. S. Gjerdrum, W. E. Devereux, White in the matter, it may be stated that the railway company has furnished the intending settler with transpor-James, A. W. Sherer and wife, Mrs. desirable land may lie along its line. tation to enable him to see whatever W. H. Cornwell, Jr., J. J. Abreu and Mr. White, on his part, has gone up a thorough study of soil, climate and conditions, with a view to the prospects of success in the growth of pineapples, vanilla beans, strawberries. sisal or whatever products the land may be best adapted to. He will make this study so thoroughly, to see for himself, that after he has ridden over Kim Lai, M. Nyiyi, M. L. May, B. the railway it is his purpose to walk Rubber Goods Blackie, E. J.
